

Comprehensive Plan Issues

Character Area: Suburban Area

Description: Area where typical types of suburban residential subdivision development have occurred or pressures for such type of development are greatest due to availability of water and/or sewer service. These areas are characterized by low pedestrian orientation, high to moderate building separation, predominately residential uses with scattered commercial or civic uses, and varied, often curvilinear, street patterns.

Development Strategy: Moderate density should be promoted in these areas with a greater focus on Traditional Neighborhood Development (TND) style residential subdivisions; where possible, existing development should be retrofitted to better conform to traditional neighborhood development principles. These principles include creating neighborhood focal points by locating schools, community centers, or well-designed small commercial activity centers at suitable locations within walking distance of residences.

Character Area: Neighborhood Activity Center

Description: A neighborhood focal point with a concentration of activities such as general retail, service commercial, professional office, higher-density housing, and appropriate public and open spaces uses easily accessible by pedestrians and bicycles...

Development Strategy: Each neighborhood center should include a mix of retail, services, and offices to serve neighborhood residents' day-to day needs. Residential development should reinforce the center by locating higher density housing options adjacent to the center, targeted to a broad range of income levels, including multi-family town homes, apartments, and condominiums. Design for each Center should be very pedestrian-oriented, with strong, walkable connections between different uses. Road edges should be clearly defined by locating buildings at roadside with parking in the rear. Direct connections to greenspace and trail networks should be provided. The pedestrian-friendly environment should be enhanced by adding sidewalks and other pedestrian-friendly trails/bike routes linked to other neighborhood amenities such as libraries, neighborhood centers, health facilities, parks, and schools.

Standards for the Exercise of Zoning Power (Review Criteria)

In reviewing and making a decision on a rezoning request, the City staff, Planning Commission and City Council shall consider the following standards. The proposed responses to these standards by the applicant and staff are listed below.

(1) Is the proposed zoning change consistent with the surrounding land use pattern ?	
Applicant:	Yes..
Staff:	No. Most the surrounding and nearby properties are currently developed with residential uses
(2) Are there other zonings of this type near the subject property ? or will the proposed rezoning result in an isolated zoning district unrelated to adjacent and nearby zoning districts ?	
Applicant:	Yes.
Staff:	No. There is no C-N zoning nearby, and most of the surrounding properties are zoned R-15.
(3) Will the proposed change cause an increase in population density ?	
Applicant:	No.
Staff:	No.
(4) Will the proposed change likely increase traffic on roads or increase the demand on public services (utilities, fire protection, etc..) ?	
Applicant:	Yes.
Staff:	Yes, but there is more than sufficient capacity available I these facilities.
