

Comprehensive Plan Issues

Character Area: Suburban Area

Description: Area where typical types of suburban residential subdivision development have occurred or pressures for such type of development are greatest due to availability of water and/or sewer service. These areas are characterized by low pedestrian orientation, high to moderate building separation, predominately residential uses with scattered commercial or civic uses, and varied, often curvilinear, street patterns.

Development Strategy: Moderate density should be promoted in these areas with a greater focus on Traditional Neighborhood Development (TND) style residential subdivisions; where possible, existing development should be retrofitted to better conform to traditional neighborhood development principles. These principles include creating neighborhood focal points by locating schools, community centers, or well-designed small commercial activity centers at suitable locations within walking distance of residences.

Goals and Policies:

Objective 3.2.3 – Protect well established neighborhoods from incompatible uses.

GOAL 7: LAND USE – To ensure the community’s anticipated growth occurs in a well-integrated yet organized fashion, which protects our community resources, promotes efficient use of infrastructure and transportation facilities, and supports quality economic development

POLICY 7.4 – Positive impacts on the built and natural environment shall be anticipated through only the highest standard of development throughout all parts of the community.
