

## **Comprehensive Plan Issues**

**Character Area:**      Transitional Neighborhood

**Description:** An area that has most of its original housing stock in place but housing conditions may be worsening due to low rates of homeownership and/or decline of property maintenance. There may be a lack of neighborhood identity and gradual invasion of different type and intensity of uses that may be incompatible with the neighborhood residential use. These areas may be transitioning into a mix of single-family residential, multi-family, light office professional and light commercial uses. These areas are typically located in the older, core areas of the community.

**Development Strategy:** Focus should be on strategic public investments to improve conditions, allow appropriate infill development on scattered vacant sites, and encourage more homeownership and maintenance or upgrade of existing properties. Public assistance and investment should be focused where needed to ensure that the neighborhood becomes a more stable, mixed-income community with a larger percentage of owner-occupied housing. Vacant properties offer an opportunity for infill development of new, architecturally compatible housing. Strong pedestrian and bicycle connections should be provided to enable residents to walk/bike to work, shopping, or other destinations in the area.

### **Goals and Policies:**

**GOAL 7: LAND USE** – To ensure the community’s anticipated growth occurs in a well-integrated yet organized fashion, which protects our community resources, promotes efficient use of infrastructure and transportation facilities, and supports quality economic development.

**POLICY 7.4** – Positive impacts on the built and natural environment shall be anticipated through only the highest standard of development throughout all parts of the community.

**POLICY 7.5** – Available land shall be utilized in the most efficient manner while focusing on redevelopment of land where feasible.

## **Conditional Use Review Criteria**
