

Verizon Legal Disclaimer

These maps are not a guarantee of coverage and may contain areas with no service. These maps reflect a depiction of predicted and approximate wireless coverage of the network and is intended to provide a relative comparison of coverage. The depictions of coverage do not guarantee service availability as there are many factors that can influence coverage and service availability. These factors vary from location to location and change over time. The coverage areas may include locations with limited or no coverage. Even within a coverage area shown, there are many factors, including but not limited to, usage volumes, service outages, customer's equipment, terrain, proximity to buildings, foliage, and weather that may impact service ("Factors"). The representations of "fair", "good" and "best" are qualitative representations of relative wireless outdoor signal strength at the network facilities level. Generally, calls can be made and received within all three categories, however, these Factors will likely have greater impact in areas of "fair" coverage. You can only make and receive calls when digital service is available. [When digital service is not available your device will not operate or be able to make 911 calls.]
