

Comprehensive Planning requires conducting a Strengths, Weaknesses, Opportunities, and Threats (SWOT) analysis to determine needs and opportunities. In an effort to increase engagement, SGRC Planning and GIS departments collaborated to develop an anonymous survey accessible outside of business hours. Below is a general flyer created by SGRC Planning Staff that can be used for all communities in the region. The questions are the same; however, once a respondent selects their county and respective city, the data populates for the selected county and/or city.
