

Community Vision Survey Flyer

This is a survey specifically developed to collect responses from citizens of Lowndes County and the Cities as well as those that work there. The set of questions respondents answered depended on their answer to the first question.

The Survey was open from August 2025 until December 2025 allowing months of opportunity for citizens and officials to participate.

This survey garnered twenty (20) responses. This is likely due to the fact that the SWOT survey is required to be done during the comprehensive planning process, and this one was optional.
