

## LETTER OF INTENT

Date 08/04/19

Thomas and Lauren Ley at 4349 McMullen Dr, Valdosta, GA are planning on building a metal carport for their camper that is parked between the Dasher (4371 McMullen) residence and the Ley Residence (4349 McMullen). Due to the Home of the Ley's being built closer to the Dasher side of the property, there is no way for them to meet the 20ft off the property line ordinance without the metal carport being in the middle of the driveway where their cars park. For that matter, the 16ft off the line ordinance does not work either. The camper is currently parked 6ft off the property line between the Dasher residence and the Ley residence. This is the only place that the Ley's can park the camper on their property without impeding the driveway. If the carport does not get approved, it will remain parked 6ft off the property line as there is no place else to park it.

They Leys are planning on building a 16'x40' metal carport to protect the 2019 camper they own. The sun will damage the roof over time as well as other components. The Ley's plan to build the carport at least 16ft wide so that the slide of the camper can be let out when parked under the metal carport and use camper for guests when needed while parked under carport.

The metal carport will only have poured concrete footers. The area where the camper is parked will not be poured in concrete.

If the Dashers sell their residence within the next five years and the new owners do not like the metal carport, it will be removed by the Ley's.

The signatures below show that the Leys have shown what they plan to build and stated the reasons why.

I give my consent for the Leys to build the carport 6ft off the property line.
